## SA\_BASS\_1\_0\_1

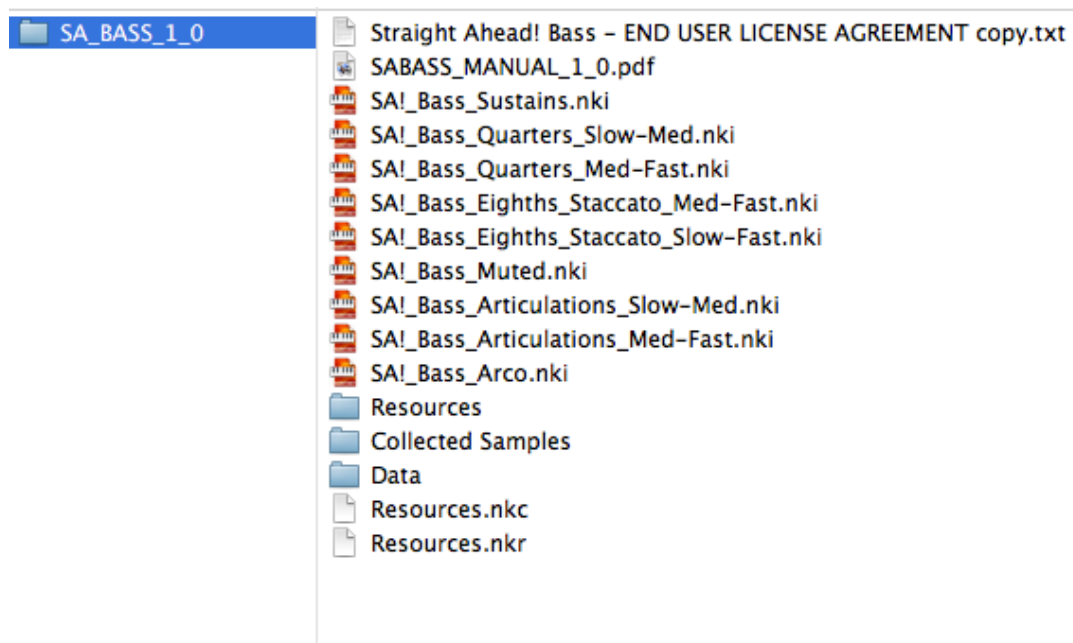

Thank you for your order of Straight Ahead! Bass (Download). You may download using the following URLs:

SA\_BASS\_1\_0\_1

<https://sites.fastspring.com/straightheadsamples/order/dl/STR140324-2147-70212F>

2. Click the download link and wait for it to complete. For SA! Bass, your file should be called **SA\_BASS\_1\_0\_1.rar** and should be 3.02GB in size.
3. Extract the .rar file using an app like “unRARx” on a mac, or “Free RAR Extract Frog” on a PC. If you get an error, in extracting, there most likely was a problem in the download. Try deleting the downloaded .rar and retry downloading the library.
4. Your extracted folder should look like this:

5. Drag the entire folder just extracted (“SA\_BASS\_1\_0”) to your sample drive (the hard drive where you keep all your sample libraries).
6. Open Kontakt 5 or a Kontakt 5 instance in your DAW. Using the “Files” tab, navigate to your newly copied SA\_BASS\_1\_0 folder. You will see all the instruments available. Note: this library will NOT appear in the “Libraries” tab.

7. Double-click or drag in the instrument with the corresponding articulation/tempo of your choosing.
8. Please reference your SABASS\_MANUAL\_1\_0.pdf included in your folder for more detailed explanation of the patches and methods of using the library.
9. Enjoy!
